## Appendix 2: Kinetics Assignment \#1

The formation of nitrogen dioxide from nitrogen dioxide and oxygen gas was studied. The balanced equation for the reaction is:

$$
\mathrm{O}_{2(g)}+2 \mathrm{NO}_{(g)} \rightarrow 2 \mathrm{NO}_{2(g)}
$$

The chemist measured the concentration of the three gases at various time intervals. The data is in the table below. Construct a graph to represent this data. Plot gas concentration along the $y$-axis and time on the $x$-axis.

| Time (min) | Concentration (mol/L) |  |  |
| :---: | :---: | :---: | :---: |
|  | $\left[\mathrm{O}_{2}\right]$ | [NO] | [NO $\left.{ }_{2}\right]$ |
| 0 | 0.000343 | 0.000514 | 0 |
| 2 | 0.000317 | 0.000461 | 0.000053 |
| 4 | 0.000289 | 0.000406 | 0.000108 |
| 6 | 0.000271 | 0.000368 | 0.000146 |
| 10 | 0.000242 | 0.000311 | 0.000204 |
| 16 | 0.000216 | 0.000259 | 0.000256 |
| 26 | 0.000189 | 0.000206 | 0.000308 |
| 41 | 0.000167 | 0.000162 | 0.000353 |
| 51 | 0.000158 | 0.000143 | 0.000372 |
| 61 | 0.000150 | 0.000127 | 0.000387 |
| 71 | 0.000144 | 0.000116 | 0.000399 |

Average rates over a period of time can be calculated by connecting two points on your curve with a straight line and determining slope.

Instantaneous rates are determined by drawing a tangent line to the curve at the point of interest and determining the slope of the tangent line.

## Questions

1. What is the average rate of reaction for nitrogen oxide and oxygen and the formation of nitrogen dioxide over the entire 71 minute interval? Determine the rate for each.
2. What is the average rate of the consumption of NO and $\mathrm{O}_{2}$ and the production of $\mathrm{NO}_{2}$ over the first 10 minutes, and over the last 10 minutes?
3. Find the instantaneous rate of consumption of $\mathrm{O}_{2}$ and NO and the instantaneous rate of formation of $\mathrm{NO}_{2}$ at 4 minutes and 41 minutes into the experiment. Show your work on the graph. Explain why the rate changes.
4. What do you notice about the ratios of the rates oxygen and nitrogen monoxide consumption to the production of nitrogen dioxide?
